

A COMPOSITION FOR INDUCING HUMORAL ANERGY TO AN
IMMUNOGEN COMPRISING A T CELL EPITOPE-DEFICIENT
ANALOG OF THE IMMUNOGEN CONJUGATED TO A
NONIMMUNOGENIC VALENCY PLATFORM MOLECULE

5

Abstract of the Disclosure

10 Conjugates of nonimmunogenic valency platform molecules
and analogs of immunogens that possess the specific B cell
binding ability of the immunogen but lack T cell epitopes and
which, when introduced into individuals, induce humoral anergy
to the immunogen are disclosed. Accordingly, these conjugates
are useful for treating antibody-mediated pathologies that are
caused by foreign or self immunogens.
